Professional Experience

Lead Mobile Engineer

Chexy, Ontario

June 2025 to Current

Leading a team of 5 developers with a 60/40 split between technical leadership and hands-on development. I mentor engineers, coordinate cross-team work, and help translate complex fintech requirements into clear technical designs.

React Native Engineer

Folks, Québec

June 2024 to June 2025

Developing the mobile application of a cutting-edge Human Resource Information System (SIRH), where I'm focused on creating a seamless user experience for HR professionals and employees alike. This project combines innovation and practicality to meet the needs of modern workforce management.

Lead Mobile Software Engineer

November 2019 to June 2024

EmptyMyFridge, Toronto

EmptyMyFridge is AI driven anti-food waste app that helps users find recipes based on ingredients they already have at home
Conceptualized, developed, and maintained EmptyMyFridge in mobile from scratch, managing all aspects from starting point to successful deployment

Currently attracts about 150 daily users, with 40k+ downloads
